

ABHIK ROY

EDUCATION

- Western Michigan University
Ph.D. in Program Evaluation  Kalamazoo, MI
- Michigan Technological University
M.S. in Mathematics  Houghton, MI
- West Virginia Wesleyan College
B.S. in Mathematics  Buckhannon, WV

PROFESSIONAL EXPERIENCE

Present
|
2023

- *Independent Evaluation Consultant*  Bloomington, IN
 - **Collaborate with Program Teams to Design and Execute Evaluations.** Partner with federally funded programs in health and education to plan, conduct, and report on evaluation activities.
 - **Communicate Findings Across Audiences.** Develop written reports, federal submissions, and journal manuscripts summarizing evaluation results, and prepare tailored materials for program staff and external stakeholders.
 - **Create Static, Active, and Interactive Visualizations.** Build fixed, animated, and user-driven data visualizations using R and Shiny to support reporting, exploration, and decision-making.
 - **Develop and Validate Survey Instruments.** Design, test, and refine tools to collect data on participant experiences, program quality, and implementation outcomes.
 - **Lead Data Analysis and Mixed-Methods Studies.** Analyze quantitative and qualitative data, including longitudinal and cross-sectional sources, to assess progress and guide program decisions.
 - **Support Research and Evaluation.** Contribute to federally, state, and foundation-funded initiatives in health, education, and community development, including HRSA's Healthy Start Initiative, an NSF-supported teacher preparation program, and other multi-site applied studies.

EXPERTISE

Program evaluation integrating traditional and machine learning methods

Quantitative, qualitative, and mixed-methods research

 programming

Statistical modeling and inference

Data visualization

Survey methodology spanning design, deployment, and analysis

Interpretive and computational text analysis

Web application development and reporting using

Social network analysis

Technical writing and markup using *L^AT_EX*

TECHNICAL SKILLS

Methods: Longitudinal analysis, survival analysis, predictive modeling, NLP, topic modeling, clustering

Tools: Qualtrics, Shiny, Tableau, SQL

2023
|
2016

● *Assistant Professor*
West Virginia University

📍 Morgantown, WV

- **Analyzed and Visualized Data for Diverse Audiences.** Processed internal and external data sources and produced more than 20 interactive visualizations using RMarkdown and Shiny to support dissemination.
- **Built Automated Data Systems.** Developed systems to automate data collection, cleaning, and analysis, improving efficiency and accuracy across multiple research projects.
- **Designed and Deployed Web-Based Surveys.** Developed interactive surveys on the Qualtrics platform, using HTML, CSS, and JavaScript to improve user experience and aesthetics, resulting in over 7,000 responses across multiple studies.
- **Led and Contributed to Federally Funded Evaluations.** Participated in 12 program evaluations, leading several and supporting analysis on others, primarily in education and health.
- **Published Peer-Reviewed Publications.** Authored 10 peer-reviewed articles and presented findings at over 20 conferences, primarily national, reaching interdisciplinary audiences.
- **Mentored Graduate Students Through Degree Completion.** Supported three Master's and one PhD student through all stages of their graduate work, including research, analysis, and writing.
- **Taught Methods-Focused Courses with a Data Science Emphasis.** Delivered courses in evaluation, research methods, measurement, and survey design to several hundred students, emphasizing applied data science and real-world data use.

2016
|
2014

● *Data Analyst*
University of Kansas

📍 Lawrence, KS

- **Analyzed the Impact of Student Services.** Merged surveys, interviews, and registrar data to study how advising affected persistence, retention, and graduation.
- **Built Web Applications and Dashboards.** Automated data pulls from the Oracle warehouse and refreshed Tableau dashboards with new R scripts.
- **Conducted Research to Improve Retention.** Built predictive and survival models using logistic regression and time-to-event analysis that flagged at-risk students, informing interventions that raised retention by up to five percentage points.
- **Developed an Evaluation Model for Advising.** Synthesized findings from Delphi panels, interviews, survey metrics, and time-to-event analysis into a unified framework for evaluating advising quality.
- **Designed and Executed Questionnaires.** Distributed questionnaires to 300 students and staff; achieved response rates as high as 91%.
- **Led Tailored Evaluations.** Ran needs assessments and participatory evaluations for advising, student-life, and support units.

▲ **SELECT EVALUATION WORK**

Current
|
2023

● *Lead Program Evaluator & Methodologist - Healthy Start Initiative* ([HRSA-19-049](#) Total Award: \$5,470,000)
West Virginia University Research Corporation

📍 Morgantown, WV

- Created and validated survey instruments to assess participant experiences, collecting data from more than 50 individuals.
- Conducted evaluation studies of program activities and authored the evaluation section of the HRSA annual report, as well as a related federal funding renewal proposal.
- Designed and led program-level evaluations, including process, monitoring, and impact studies.
- Developed and implemented a mixed-methods study to analyze longitudinal and cross-sectional data, focusing on smoking cessation among mothers and the experiences of new or distant caregivers and fathers.

2022
|
2017

● *Community Program Evaluator & Data Scientist*
WVCTSI: West Virginia Clinical and Translational Science Institute ([2017-NIH 2U54GM104942-02](#) Total Award: \$20,000,000)
West Virginia University

📍 Morgantown, WV

- Authored quarterly reports as well as internal and external annual evaluation documents, disseminated both in print and through interactive formats developed in Rmarkdown.
- Created data visualizations and developed Shiny applications to support internal and public data exploration.
- Designed and disseminated tailored Qualtrics surveys reaching over 5,000 individuals, with user experience and visual design enhanced through HTML, CSS, and JavaScript.
- Led local and multi-site evaluation studies that informed policies across five core medical research and health outreach efforts.
- Mentored multiple graduate students in social data science as they developed and completed independent research projects.
- Published and presented research on WVCTSI programs in academic journals and at conferences.
